

ADDITIONAL SAFETY NOTE - JESUS LOCK PORTAGE

This announcement affects everyone on the 5 mile and 7 mile courses (classes 1-25).

There are some engineering works going on at Jesus Lock at the moment. A section along the towpath is fenced off - although easily passable, yet it creates a tunnel which may be dangerous for pedestrians and cyclists who also use the path.

Additionally, the narrow stairs down to the river are slippery, and the concrete edging along the river is subsiding and coming away from the bank.

As a result, **I have decided to make this a walking portage** and I will post additional marshals there.
